

## Digital Pressure Gauge FAQs

Q: Is this gauge NEMA rated?

A: Yes. It is rated NEMA 4X.

Q: What engineering units are included?

A: Each gauge includes up to 15 field selectable engineering units depending on the sensor range. The selectable units include PSIG, kiloPascals, megaPascals, millibar, bar, atmospheres, kilograms per square centimeter, grams per square centimeter, centimeters of water, ounces per square inch, feet of water, inches of water, millimeters of mercury, Torr and inches of mercury.

Q: Are compound gauges available?

A: Yes. Compound gauges that can be used for positive pressure measurements and vacuum pressure measurements are available.
