

## Series 10A/11A Inline Type Accutube® FAQs

Q: Why are Meriam averaging pitot tubes called “Accutubes”?

A: Accutube is a brand name that Meriam uses for its product line of averaging pitot tubes. It is appropriate because of the high level of accuracy that is demonstrated by all Meriam products, especially averaging pitot tubes.

Q: How does an Accutube compare to an orifice?

A: It has been proven that the Accutube’s flow measurement accuracy is better than that of the orifice.

Q: What are the cost benefits of purchasing a Meriam Accutube?

A: The Accutube generates considerable cost savings with its simple installation and wear-free, energy-efficient design, providing a viable alternative to traditional flow measurement devices.
