

M1 Series FAQs

Q: I need better accuracy, but am still interested in the M1 Series, what can I do?

A: Order the M101 Calibrator when better accuracy is needed for more exacting measurements. The M101 delivers +/- 0.10% FS accuracy.

Q: Can the M1 be calibrated in the field?

A: Yes. The M1 can be calibrated in the field for zero and span.

Q: What certifications are available?

A: NIST Traceable Certificate with Data is available.
