

## M200 FAQs

Q: What is included with my M200?

A: All models include a protective red boot, 4 AA Alkaline batteries and user's manual.

Q: Can I replace the batteries in my M200 unit myself?

A: Yes. They are simply 4 AA Alkaline batteries.

Q: Can the M200 be calibrated in the field?

A: Yes. The M2 series can be recalibrated in the field for zero, span and linearity. The user has the option to select a 1 point or 5 point calibration procedure. Enables users with accurate primary standards to calibrate their devices locally if desired.
