

Meri-Cal FAQs

Q: How do I know which model to order?

A: LP models measure gauge pressure only. DP models can be used to measure differential pressure, gauge pressure and vacuum.

Q: If I do not order the Meri-Cal kit will I still receive a carrying case?

A: Yes. All Meri-Cals ordered without the kit have a soft vinyl, padded carrying case.

Q: What certifications are available?

A: Meri-Cal is available with CSA certification for intrinsic safety for use in Class I, Groups A, B, C and D areas.
